A first principle is a rule, guideline, law or theory that has broad explanatory power such that it can be applied to a large number of situations. These aren't necessarily factual and can be assumptions or approaches that are adopted by a society, organization or team. For example, an architect who embraces minimalism may use form follows function as a first principle to guide design where this represents their style as opposed to a universal truth.

Answer: The law (or principle or rule) of first mention is a guideline that some people use for studying Scripture. The law of first mention says that, to understand a particular word or doctrine, we must find the first place in Scripture that word or doctrine is revealed and study that passage. The reasoning is that the Bible ' s first mention of a concept is the simplest and clearest presentation; doctrines are then more fully developed on that foundation.
