Includes Part 1, Number 2: Books and Pamphlets, Including Serials and Contributions to Periodicals July - December)

This book is a detailed manual for the implementation of competence diagnostics in the field of vocational training. With the COMET competence model, both conceptual competences as well as practical skills are recorded and evaluated. The manual guides through all methodological steps, including the preparation and implementation of tests, cross and longitudinal studies, the development of context analyses and measurement methods for the test motivation. The focus of the final chapter is the application of the COMET procedure for the design, organisation and evaluation of vocational education and training processes.

Haynes disassembles every subject vehicle and documents every step with thorough instructions and clear photos. Haynes repair manuals are used by the pros, but written for the do-it-yourselfer.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.
