Similarities between esoteric and mystical currents in different religious traditions have long interested scholars. This book takes a new look at the relationship between such currents. It advances a discussion that started with the search for religious essences, archetypes, and universals, from William James to Eranos. The universal categories that resulted from that search were later criticized as essentialist constructions, and questioned by deconstructionists. An alternative explanation was advanced by diffusionists: that there were transfers between different traditions. This book presents empirical case studies of such constructions, and of transfers between Judaism, Christianity, and Islam in the premodern period, and Judaism, Christianity, and Western esotericism in the modern period. It shows that there were indeed transfers that can be clearly documented, and that there were also indeed constructions, often very imaginative. It also shows that there were many cases that were neither transfers nor constructions, but a mixture of the two.

present book reveals the riches of the earliest known astrological autobiography, authored by Henry Bate of Mechelen (1246–after 1310). Exploiting all resources of contemporary astrological science, Bate conducts in his *Nativitas* a profound self-analysis, revealing the peculiarities of his character and personality at a crucial moment of his life (1280). The result is an extraordinarily detailed and penetrating attempt to decode the fate of one's own life and its idiosyncrasies. The *Astrological Autobiography of a Medieval Philosopher* offers the first critical edition of Bate's *Nativitas*. An extensive introduction presents Bate's life and work and sheds new light on the reception and use of Greek, Latin, Arabic, and Hebrew texts among scholars in Paris at the end of the 13th century. The book thus provides a major new resource for scholars working on medieval science, autobiography, and notions of personhood and individuality.

Intellectual History and the Identity of John Dee In April 1995, at Birkbeck College, University of London, an interdisciplinary colloquium was held so that scholars from diverse fields and areas of expertise could exchange views on the life and work of John Dee. Working in a variety of fields - intellectual history, history of navigation, history of medicine, history of science, history of mathematics, bibliography and manuscript studies - we had all been

drawn to Dee by particular aspects of his work, and participating in the colloquium was to c- front other narratives about Dee's career: an experience which was both bewildering and instructive. Perhaps more than any other intellectual figure of the English Renaissance Dee has been fragmented and dispersed across numerous disciplines, and the various attempts to re-integrate his multiplied image by reference to a particular world-view or philosophical outlook have failed to bring him into focus. This volume records the diversity of scholarly approaches to John Dee which have emerged since the synthetic accounts of I. R. F. Calder, Frances Yates and Peter French. If these approaches have not succeeded in resolving the problematic multiplicity of Dee's activities, they will at least deepen our understanding of specific and local areas of his intellectual life, and render them more historiographically legible.

An alternative history of philosophy has endured as a shadowy parallel to standard histories, although it shares many of the same themes. It has its own founding texts in the late ancient Hermetica, from whence flowed three broad streams of thought: alchemy, astrology, and magic. These thinkers' attitude toward philosophy is not one of detached speculation but of active engagement, even intervention. It appeared again in the European Middle Ages, in the Renaissance with Rabelais,

Paracelsus, Agrippa, Ficino, and Bruno; and in the early modern period with John Dee, Robert Fludd, Jacob Böhme, Thomas Browne, Kenelm Digby, van Helmont, and Isaac Newton. In the 18th-19th centuries, this book considers Lichtenberg's Fragments, Berkeley's Siris, Swedenborg, Hegel, von Baader, and great Romantics such as Novalis, Goethe, S. T. Coleridge, and E. A. Poe, as well as Nietzsche; and in the 20th century it turns to the great modernist literature of Fernando Pessoa, Robert Musil, Ernst Bloch, and P. K. Dick.

In 1936 Dr. Josef Mengele discovers Victor Frankenstein's lab journal in the attic of an Ingolstadt dormitory and is tasked by the Reich Institute with replicating his reanimation procedure. While hiding in a bookstore in Warsaw, a pair of Jewish twin brothers, Jotham and Eli Podczaski, come across the letters of Captain Walton to his sister, detailing the ill-fated story of Frankenstein. When Jotham and Eli are captured by the Gestapo and encounter Mengele in the gray confines of Auschwitz KZ, they alone recognize the origin of his bizarre, sadistic experiments. Jotham hatches a plan to escape the camp and travel north, to find the only being capable of stopping Mengele from providing the Third Reich with a new race of undying stormtroopers;

Discovered in a hidden compartment of an old chest long after his death, the secret writings of John Dee, one of the leading scientists and occultists of Elizabethan England, record in minute detail his research into the occult. Dee concealed his treatises on the nature of humankind's contact with angelic realms and languages throughout his life, and they were nearly lost forever. In his brief biography of John Dee, Joseph Peterson calls him a "true Renaissance man" detailing his work in astronomy, mathematics, navigation, the arts, astrology, and the occult sciences. He was even thought to be the model for Shakespeare's Prospero. All this was preparation for Dee's main achievement: five books, revealed and transcribed between March 1582 and May 1583, bringing to light mysteries and truths that scholars and adepts have been struggling to understand and use ever since. These books detail his system for communicating with the angels, and reveal that the angels were interested in and involved with the exploration and colonization of the New World, and in heralding in a new age or new world order. While Dee's influence was

certainly felt in his lifetime, his popularity has grown tremendously since. His system was used and adapted by the Hermetic Order of the Golden Dawn, and subsequently by Aleister Crowley. This new edition of John Dee's Five Books of Mystery is by far the most accessible and complete published to date. Peterson has translated Latin terms and added copious footnotes, putting the instructions and references into context for the modern reader.

This book is about Elizabethan England's most famous 'scientist' or natural philosopher John Dee and his 'conversations with angels'.

If, as the late J. Allen Hynek claimed, over 1 in 40 people have been abducted and 'processed' by the 'alien/secret government' agenda -- or 1 in 10 according to more recent sources -- then you are bound to know SOMEONE who is an abductee and KNOWS it. This information is for THEM. For those who are not "UFO Abductees," the information in this file is nevertheless vital and applicable, and may one day save your life!!! If you believe that information about "Aliens" is only for those who have lost all touch with reality, then PLEASE accept that information in this document that you CAN accept, and pass over the rest, at least for now. Your future may depend on it. As I have said, this information may save your life. This file contains the most intricate

and intimate details of a global conspiracy which seems to be rooted in an alien - military - industrial collaboration which is intent on bringing all freedom-loving peoples of this world under its control, through the implementation of a global government which has commonly been referred to as the 'New World Order'. We have pulled no punches and are laying everything out on the table in regards to the New World Order agenda as I and those who have contributed to this document perceive it. If you are one who is easily offended, then be warned. Most of you who read this will realize that you may have personally supported in one form or another -- albeit unknowingly -- certain religious, economic, or political organizations which are on various levels being controlled by those forces that are working towards the implementation of the New World Order. Those who have contributed to this file have not compromised nor held back on what they perceive to be the truth in regards to this conspiracy. We make no apologies, since we feel that this agenda has already been responsible for damaging this American Republic in ways that most cannot even begin to comprehend, and will continue to be a threat to its very existence and prosperity until this 'enemy' is forever purged from our nation and those traitors responsible for violating our national security and 'selling out' this Constitutional Republic of the United States of America are brought to justice. . In many ways, Arbatel is unique among texts on magic. Unlike the vast majority of writings, it is clear, concise, and elegantly written. The practical instructions are straightforward and undemanding. When it first appeared in 1575, it attracted the attention of people with a surprisingly broad range of agendas, including some of the finest minds of the time. Often quoted and reprinted, both praised and condemned, its impact on western esoteric philosophy has been called

"overwhelming." Arbatel's magic is full of wonder and free from the sinister elements usually associated with texts on the subject. But it is about more than magic; filled with gnomonic wisdom, it urges us to help our neighbors, be positive and grateful, and use time wisely. Above all, it teaches us to pay attention, looking for the wondrous and miraculous. In fact, to the author this virtually defines the magus. Included are illustrations, bibliography, index, and original Latin text. First English translation published since in 1655.
