This title is one of a three volume set entitled The Applications of Synthetic Resin Lattices, which discusses the preparation and application of specific groups of latices or polymer emulsions. Volume 2 Lattices in Surface Coatings: Emulsion Paints describes the principles of the formulation, manufacture and application properties of water-based 'emulsion' paints and related surface coatings.

Styrene-butadiene or styrene-butadiene rubber (SBR) describe families of synthetic rubbers derived from styrene and butadiene (the version developed by Goodyear is called Neolite).These materials have good abrasion resistance and good aging stability when protected by additives. In 2012, more than 5.4 million tonnes of SBR were processed worldwide. About 50% of car tires are made from various ...
