designing openings for
reducing fittings;

ASME/ANSI B16 Standards for Pipes and Fittings

This Standard is allied to ASME standards B16.18 and B16.22. It provides requirements for fitting ends suitable for brazing. This Standard covers: (a) pressure-temperature ratings; (b) abbreviations for end connections; (c) size and method of designating openings of fittings; (d) marking; (e) material; (f) dimensions and tolerances; and (g) testing.

FACTORY . . .

This standard covers pressure-temperature ratings, materials, dimensions, tolerances, marking, testing, and methods of designating openings for pipe flange and flanged fittings. ASME B16.5 standard covers Steel Pipe Flanges and Flanged Fittings from NPS 1/2 through NPS 24 Metric/Inch in pressure class 150 to class 2500. Flanges and flanged fittings made from cast or forged materials.

Mechanical Engineers - ASME

The American Society of Mechanical Engineers - ASME

Typical facing finishes are defined in centerline average or roughness average R_a , which is the arithmetic average of the absolute values of the profile height deviations from the mean line. The facing finish of ASME B16.5 flanges shall be judged by visual comparison with R_a standards stipulated by ASME B46.1 and not by instruments having stylus tracers and electronic amplification.
