Phil hatte alles: Einen Studienplatz an einem der besten Colleges in Kalifornien, nette Freunde, liebende Eltern und die ungetrübte Aussicht auf eine glänzende Zukunft. Dass seine Träume brüchig und auf nichts als Schulden gebaut sind, wird ihm klar, als sein Vater das gut laufende Geschäft verliert und Phil auf einen abgelegenen Campingplatz ziehen muss. Voller Angst und Sorge um seine Familie fällt es ihm schwer, seine Situation zu akzeptieren, und auch die Schönheit der Natur und die raue Freundlichkeit, mit der er an dem

fremden Ort aufgenommen wird, sind nur ein schwacher Ausgleich für seinen Verlust. Lediglich Noah, der junge Mann, der wenig spricht und allein in einem riesigen Wohnmobil lebt, weckt Phils Interesse, und so groß die Unterschiede zwischen ihnen sind, so echt fühlt sich sein Leben plötzlich an. Denn Noah zeigt ihm zwischen ihren stolpernden Herzscl ägen und tiefsten Wünschen nicht nur die Hitze eines Sommers unter freiem Himmel, sondern auch, wie dunkel die Nächte dort draußen werden können, wie laut sie wirklich über Verlorenes flüstern, und wie viel ein Mensch aushält, wenn er muss. Doch bis Phil auch begreift, dass Geld weder Hoffnung noch Trost spenden kann und Noah um beides betrogen wurde, scheint alles, was er wirklich will, wieder nur ein Traum zu sein. — "Sprachlich einzigartig, feinfühlig erzählt und ob der Tragik herzerreißend schön hallen Phil und Noah noch lange nach." When reading the Chinese city, which this book sets out to do, it is not the well-known cities such as Beijing, Shanghai, and Xi an that are in the focus of attention, but rather the essentially Chinese of the Chinese city, those characteristics or attributes that are more or less shared by all Chinese cities. The spotlight is on their spatial grammar, their syntax, in short: their code. Only by deciphering their common traits a view to the underlying structure of Chinese cities is opened, and we can begin to reasonably evaluate and classify the diversity of impressions. Deciphering the code of the Chinese city also enables the author to read new Chinese towns designed by Western architects. Thus, readers are provided with valuable insight on China s booming urbanization and urban development.

This Second Edition of the Handbook does much more than update the first edition; because the field of infancy has grown so much in recent years, and continues to grow, this volume now includes perspectives on many new issues. Covers issues such as the concept and influence of temperament, meaning of attachment relationships, continuities and discontinuities, infant mental health, media, society and child development. The Second Edition includes several European chapters, providing a review of infancy research from the Continent. Includes more clinical perspectives on infant development and discusses implications of the research for intervention and application.

Since Gary Becker ' s seminal article in the late sixties, the economic analysis of crime has blossomed, from an interesting side field within law and economics, into a mature stand-alone sub-discipline that has been embraced by many well-respected academic economists. Wide ranging and accessible, this is the most up-to-date textbook in this area, taking current economic research and making it accessible to undergraduates and other interested readers. Without use of graphs or mathematical equations, Winter combines theory and empirical evidence with controversial examples from the news media. Topics discussed include: the death penalty, racial profiling, rational drug addiction and drug legalization, private crime deterrence, gun control, the privatization of prisons, juvenile crime, alternative social reforms to deter crime By requiring no previous knowledge of economics, not only is this book a perfect choice for students new to the study of economics and public policy, it will also be of interest and accessible to students of criminology, law, political science, and other disciplines interested in the study of crime topics. By emphasizing the benefits and costs of social policy to deter crime, The Economics of Crime can be enjoyed by anyone who follows current public policy debate over one of society ' s most contentious issues.

Introducing a major new doctrinal work written by Elder Jeffrey R. Holland who shares his apostolic witness of the central figure of the Book of Mormon—the Lord Jesus Christ. For most of a decade, Elder Holland has read the Book of Mormon repeatedly and thoroughly, focusing on all references to the Savior and his teachings. The result is an intelligent observation and thorough study of the Book of Mormon's contribution to our understanding of Christ. On the illustrated edition: Elder Holland's classic examination of Jesus Christ as the "principal and commanding figure" in the Book of Mormon is now available as an illustrated keepsake. This landmark book explores what the Book of Mormon reveals about the character, attributes, and mission of our Savior. In his warm and thoughtful style, Elder Holland explains why, more than any other book, the Book of Mormon "has taught me to love the Lord Jesus Christ and to consider the full wonder and grandeur, the eternally resonating power of the atoning sacrifice he made for us." Stunning full-color illustrations by Walter Rane, Robert Barrett, Simon Dewey, Joseph Brickey, and others bring vibrant

new life to this beloved volume.

This outstanding memorial volume records and reassesses the contributions of Merton M. Gill (1914-1994), a principal architect of psychoanalytic theory and a principled exemplar of the modern psychoanalytic sensibility throughout the second half of the 20th century. Critical evaluations of Gill's place in psychoanalysis and a series of personal and professional reminiscences are joined to substantive reengagement of central controversies in which Gill played a key part. These controversies revolve around the "natural science" versus "hermeneutic" orientation in psychoanalysis (Holt, Eagle, Friedman); the status of psychoanalysis as a one-person and/or two-person psychology (Jacobs, Silverman); psychoanalysis versus psychotherapy (Wallerstein, Migone, Gedo); and the meaning and use of transference (Kernberg, Wolitzky, Cooper).
