Scientists knew a pandemic was only a matter of time. We weren't prepared for COVID-19. We're not prepared for monkeypox. And there's more to come.

Biology: Have we learned the lessons of COVID-19? Doubtful. And now we're facing monkeypox

Using proteomics and other advanced tools of molecular biology, an international team of researchers led by a group from Karolinska Institutet have found a novel way to diagnose Alzheimer's disease by ...

Novel way to diagnose Alzheimer's disease by blood analysis

Many doctors do not understand rare diseases, causing patients to feel invalidated and receive incorrect treatments. Patients can come together to make sure their voices are heard, which is especially ...

A Patient's Perspective of Their Rare Disease Is Important

A team of researchers from the Max Planck Institute for Evolutionary Anthropology, the Max Planck Institute for the Science of Human History, the British School at Athens and Temple University has ...

Evidence of pathogens in ancient DNA could help explain the fall of two civilizations

Lifestyle factors such as diet and smoking can affect a person's cancer risk, but biology also seems to play an important role in men ...

Why Men Face a Higher Risk of Most Cancers Than Women

Studying a deadly type of breast cancer called triple negative, Johns Hopkins Medicine scientists say they have identified key molecular differences between cancer cells that cling to an initial tumor ...

Scientists identify novel molecular biomarkers in cells that spread a deadly form of breast cancer

Studying heart samples from patients with cardiomyopathies, as well as from controls without heart disease, researchers have provided new insights into the cellular and molecular biology of human ...

Study provides new insight into the cellular and molecular biology of human heart failure

New studies of genetic material, or eDNA, shed by plants and animals are providing astonishing biological insights.

Hidden DNA is revealing secrets of animals' lives

Studying heart samples from patients with cardiomyopathies, as well as from controls without heart disease, researchers have provided new insights into the cellular and molecular biology of human ...

A close-up look at cardiomyopathies provides a new view of how heart failure results

Using new technologies to study thousands of genes simultaneously within immune cells, researchers at Gladstone Institutes, UC San Francisco (UCSF), and Stanford School of Medicine have created the ...

UCSF: Scientists Map Networks of Disease-Associated Immune Genes

Younger adults (ages under 50) with non-small cell lung cancer (NSCLC) were significantly more likely than older adults to be diagnosed with advanced disease, a researcher said here. In 2018, 5 years ...

Young Adults With NSCLC More Apt to Get Advanced Disease Diagnosis

DeepMind, an AI firm owned by Google's parent company, Alphabet, said its program can now predict the structure of nearly every protein known to science.

Protein predictions: AI group says it has solved one of biology's 'grand challenges'

Thorne HealthTech, Inc. ("Thorne HealthTech" or "Thorne") (NASDAQ: THRN), a leader in developing innovative solutions for a personalized approach to health and wellness, today announced a two-year ...

Thorne HealthTech Announces Two-Year Collaboration with AstraZeneca on Disease Discovery System to Advance Novel Drug Discovery

Pre and Post Covid is covered and Report Customization is available. According to Facts and Factors, the growth ...
