Northern California has recorded a total of 559 birds. Only two entire states have recorded more - Texas (606) and all of California (601). This book leads you to 81 prime birding areas, with 294 individual sites and 102 maps. Seasonal bar graphs are provided for regularly occurring species.

**Birding Northern California Falcon Guides Birding: Amazon ...**

Because of long-standing conservation efforts, the number of wetlands set aside are impressive, and the birding here all year-round has become almost legendary for Northern California. For example, at the Yolo Basin Bypass loop, we look for regular wintering species along with specialties seen in this year's Christmas Bird Count.

**California Birding Tour - Birds & Wine Tour | Naturalist ...**

For birding, Northern California is one of the few places in the United States where mountains, marshland, deep forest, open ocean and arid grassland exist within a short drive of one another. Because of its location, you can find birds that nest above the Arctic Circle and migrate south in the same area as birds that breed in Mexico and migrate
