The Canon PowerShot G12 offers direct access to a variety of shooting modes from its main dial, from fully automatic to full manual. The camera's finger dial and thumb wheel also make it easy to adjust settings as required. Set the G12 to Aperture Priority and you can choose from 10 f-numbers from f2.8 to f8 (when fully zoomed-out).

Canon PowerShot G12 - | Cameralabs
The G12's HDR mode works by combining three images - one of the 'correct' exposure plus one over-exposed image to capture shadow detail and an underexposed image for highlight detail that would otherwise be missing. These exposures are then sandwiched together in-camera to produce a single image.
