Step 1, Set the parking brake and disconnect the negative cable from your car battery. Be sure to do this to avoid short-circuiting the electrical system during the installation, which could lead to fire or physical harm for you.[1] X Research source For instructions on disconnecting the battery, see [How to Disconnect a Car Battery](#).Step 2, Unscrew any screws that are securing the trim in place. Be careful to remove all screws before trying to pry off the trim or you may break it.[2] X ...

### **How to Install a Car Stereo - Crutchfield: Car Stereo ...**

If you're a total newbie to the world of car audio systems, then there's just one key fact that you should be aware of. It isn't some byzantine formula that's used to calculate speaker power levels or optimal speaker placements. It doesn't have anything to do with squeezing every last bit out of a car audio capacitor or adding an additional battery.

Often, you will discover four screws attached to the dash itself or side brackets. Once these are out, the stereo should slide out too. Fitting Cage & Spring Clip Using the removal keys provided by your car stereo supplier, fix them in to the correct channels and listen for a faint 'click' as the keys lock in to position. Usually, this is enough to extract the stereo, however, you may also need to adjust the pins before pulling them to release the unit from the cage.
