Scientific Measurement

A measurement is a quantity that has both a number and a unit. The unit typically used in the sciences are those of the International System of Measurements (SI). Scientific notation consists of three parts: the coefficient, the base, and the exponent. Coefficients must be between 1.0 and 9.99999, the base is always $\times 10$, and the exponent represents the number of places we have moved the decimal point in order to convert from standard form to scientific notation.
