Circulatory and respiratory systems. Chapter overview. 1.5 weeks. Learners would have already had an overview of the circulatory and respiratory systems in chapter 2. However, the overview introduced them in isolation, whereas these two systems are very tightly integrated. This chapter will look at these processes and associated organs in more detail and how the two systems are linked.

[Summary | Circulatory and respiratory systems | Siyavula](#)

The circulatory or cardiovascular system's ability to deliver oxygen throughout the body depends on proper functioning of the respiratory system. The interactions between the cardiovascular and respiratory systems are best demonstrated by following the path of a red blood cell starting in the heart and traveling through the lungs.

Key Concepts: Terms in this set (23) Circulatory System or Cardiovascular System. is like a circle. Nutrients and oxygen are transported though our bodies, along with the Immune System. This circle continues ...

[Circulatory and Respiratory System Test Flashcards | Quizlet](#)

The respiratory and circulatory systems must work together to provide oxygen to the cells. In the cells a process called cellular respiration takes place. Cellular respiration uses the Krebs' cycle to produce energy in the form ATP needed for the cell to function. Oxygen is necessary for the Krebs' cycle to work.

The Circulatory System. The circulatory system includes the heart, a major muscle in the body, and the pathways to transport blood, which are the veins and arteries. The heart has two chambers known as the left and right ventricles. The aorta is the largest artery in the body and serves like a centralized command station. The Respiratory System

### How Do the Circulatory and Respiratory Systems Work Together?

1. Describe the circulatory and respiratory systems of a crayfish. Compare them to what you see in a nematode worm. 2. The arthropods evolved a more efficient locomotory apparatus, a segmented walking leg. But this can be modified for a variety of purposes. Describe some. 3. What are the similarities between the lophotrochozoan and the ecdysozoa?
