Highly controversial when it was first published in 1981, Alasdair MacIntyre's *After Virtue* has since established itself as a landmark work in contemporary moral philosophy. In this book, MacIntyre sought to address a crisis in moral language that he traced back to a European Enlightenment that had made the formulation of moral principles increasingly difficult. In the search for a way out of this impasse, MacIntyre returns to an earlier strand of ethical thinking, that of Aristotle, who emphasised the importance of 'virtue' to the ethical life. More than thirty years after its original publication, *After Virtue* remains a work that is impossible to ignore for anyone interested in our understanding of ethics and morality today.

Consumer fi nancial literacy education often appears as a helpful, commonsense solution to neoliberalism and the individualization of responsibility for economic risk. However, in *Financial Literacy Education: Neoliberalism, the Consumer and the Citizen* this particular literacy is argued to be both ineffective and unjust. Socially created poverty, unemployment and economic insecurity require more than individual consumer solutions; they require collective responses by engaged, critical citizens. Utilizing concepts from Marx, Foucault, Bourdieu and Baudrillard this book challenges those who claim that 'there is no alternative' to neoliberal insecurity and reduce education to a consumerist training of entrepreneurial consumer-citizens who can continually invest in themselves and the market. Through an analysis of consumer fi nancial literacy education's present and historical supports, as well as its likely effects, this book argues that the choice before us is not fi nancial illiteracy or fi nancial literacy. Rather, the choice is between subjugation to the requirements of perpetual competition or overcoming alienation, insecurity and exploitation, aims the critical fi nancial literacy education outlined at the end of this book supports. This book will appeal to those interested in understanding the conditions of our freedom in an increasingly fi nancialized world – critical educators, philosophers and sociologists of education and fi nancial literacy researchers.

From the Preface: This manual, *Child Protective Services: A Guide for Caseworkers*, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in *A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice*. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based-including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

Sherry Arnstein, writing in 1969 about citizen involvement in planning processes in the United States, described a "ladder of citizen participation" that showed participation ranging from low to high. Arnstein depicted the failings of typical participation processes at the time and characterized aspirations toward engagement that have now been elevated to core values in planning practice. But since that time, the political, economic, and social context has evolved greatly, and planners, organizers, and residents have been involved in planning and community development practice in ways previously unforeseen. Learning from Arnstein's Ladder draws on contemporary theory, expertise, empirical analysis, and practical applications in what is now more commonly termed public engagement in planning to examine the enduring impacts of Arnstein's work and the pervasive challenges that planners face in advancing meaningful public engagement. This book presents research from throughout the world, including Australia, Brazil, India, Indonesia, Portugal, Serbia, and the United States, among others, that utilizes, critiques, revises, and expands upon Arnstein's aspirational vision. It is essential reading for educators and students of planning.

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

The essential guide for the collector of mechanical wristwatches, with complete information on over 1,400 models from some 130 international brands With *Wristwatch Annual*, collectors have at hand a wealth of information on the latest offerings from today's most important watch producers, from Swiss mainstays like Rolex and Patek Philippe to the maverick independent brands springing up across Europe and the U.S. The book is arranged alphabetically by producer, and the movement, functions, case, band, price, and variations of each pictured watch are fully described. This year's edition, like its predecessors, will feature a variety of additional articles on independent watchmaking, key personalities in the watch world, and the technical aspects of horology. An illustrated glossary and a primer on watch care help acclimate the reader to the world of fine timepieces.

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT -- OVERSTOCK SALE -- Significantly reduced list price This Surgeon General's Report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social, environmental, advertising, and marketing influences that encourage youth and young adults to initiate and sustain tobacco use. This is the first time tobacco data on young adults as a discrete population have been explored in detail. The report also highlights successful strategies to prevent young people from using tobacco. This three volume set includes the following items: A booklet containing highlights from the 2012 Surgeon General's report on tobacco use among youth and teens ages 12 through 17 and young adults ages 18 through 26. This booklet provides an overview of tobacco use within this targeted age group. The second booklet is an Executive Summary with two messages. One message from for Kathleen Sebellius, Secretary of Health and Human Services and a second message from Howard Koh, Assistant Secretary of Health and contains a brief introduction to the set and summary and conclusions for each chapter contained in the final volume. The final volume contains over 800 pages of documentation, interwoven with text and data addressing the adverse health consequences of tobacco use by children and young adults. It includes research on a variety of topics, including nicotine addiction, trends in cigarette smoking among young adults, trends in smokeless tobacco use and cigar smoking over time, genetic factors in tobacco use among youth, and mass media influence on smoking to this age group to name a few. This third volume is rich with table data research findings to support the Surgeon General's concerns with America's use and tobacco. The Global Innovation Index 2020 provides detailed metrics about the innovation performance of 131 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The 2020 edition sheds light on the state of innovation financing by investigating the evolution of financing mechanisms for entrepreneurs and other innovators, and by pointing to progress and remaining challenges – including in the context of the economic slowdown induced by the coronavirus disease (COVID-19) crisis.
