Stewart's Clinical Removable Partial Prosthodontics ...

Removable prosthodontics is concerned with replacing the teeth and soft tissues with a non-permanent prosthesis that can be removed. These are often known as dentures, and can replace a full arch of teeth (complete dentures), or a number of individual or grouped tooth spaces (partial dentures).

BSSPD: Removable Prosthodontics

• to provide an overview of the complexities of managing patients requiring partial or complete dentures. Anticipated learning outcomes: The learner will: • understand and be able to apply the principles and techniques needed for the diagnosis, planning and treatment involved in removable prosthesis construction, including implant retention.

Prosthodontics: Removable Partial Dentures: Clinical

There are three phases of prosthodontics: (1) fixed prosthodontics (crowns and bridges) cemented onto teeth or implants in the mouth (FIG. 2.11), (2) removable prosthodontics (complete or partial dentures that are removable from the mouth by the patient, FIG. 2.12), and (3) maxillofacial prosthetics (a less-known part of dentistry in which noses, eyes, other parts of the face, and other body parts are replaced with prostheses [artificial parts] FIG. 2.13). General dentists accomplish ...

As before, the text provides an overview of removable partial denture service in contemporary dental practice with an emphasis on clinical and design aspects.

Stewart's Clinical Removable Partial Prosthodontics ...

A Removable partial denture (RPD) is a denture for a partially edentulous patient who desires to have replacement teeth for functional or aesthetic reasons and who cannot have a bridge any reason, such as a lack of required teeth to serve as support for a bridge or financial limitations. This type of prosthesis is referred to as a removable partial denture because patients can remove and reinsert it when required without professional help. Conversely, a "fixed" prosthesis can and should be removed
