Description. Molecular modeling techniques have been widely used in drug discovery fields for rational drug design and compound screening. Now these techniques are used to model or mimic the behavior of molecules, and help us study formulation at the molecular level.

Computational pharmaceuticals enables us to understand the mechanism of drug delivery, and

Computational pharmaceutics: application of molecular modeling in drug delivery. (Advances in Pharmaceutical Technolog). (Advances in Pharmaceutical Technolog). Wiley.

Computational pharmaceutics: application of molecular ...

Now these techniques are used to model or mimic the behavior of molecules, and help us study formulation at the molecular level. Computational pharmaceutics enables us to understand the mechanism of drug delivery, and to develop new drug delivery systems.

Computational pharmaceutics : application of molecular ...

Computational methods that are already successfully used to calculate solubility include classical molecular simulation for solvation free energies , . while partition coefficient calculations (log P) are used to predict solubility ratios or to provide a molecular understanding of the compound compartmentalization after solubilization .

Molecular modeling techniques have been widely used in drug discovery fields for rational drug design and compound screening. Now these techniques are used to model or mimic the behavior of molecules, and help us study formulation at the molecular level. Computational pharmaceutics enables us to understand the mechanism of drug delivery, and to develop new drug delivery systems.

Computational Pharmaceutics | Wiley Online Books

For such pharmaceutical systems, a combined application of experimental and computational tools (i.e. modelling and numerical simulation) is crucial. The goal of this PhD project is to develop theoretical approaches and computational algorithms that would allow prediction of the effects of molecular motions on various types of solid-state NMR ...

Predicting the effects of molecular motions on NMR by MD ...

Bunker, A. (2015). "Molecular modeling as a tool to understand the role of Poly(Ethylene) glycol in drug delivery," in Computational pharmaceutics: Applications of Molecular modelling in Drug Delivery, eds D. Ouyang and S. C. Smith (Hoboken, NJ: John Wiley & Sons), 217-234. doi: 10.1002/9781118573983.ch11. CrossRef Full Text | Google Scholar
