**Process mining vs. data
mining: What's the
difference?**

Data mining refers to the process
of analyzing large data set to
identify the meaningful pattern

Online Library Data Mining X Data Mining Protection

whereas text mining is analyzing the text data which is in unstructured format and mapping it into a structured format to derive meaningful insights. Data mining majorly depends upon the Statistical techniques and algorithm whereas text mining is

Online Library Data Mining X Data Mining Protection

dependent upon statistical techniques and linguistic analysis.

Data Mining vs Text Mining | Best Comparison to Learn with ...

Data Mining Data mining refers to the process of identifying

Online Library Data Mining X Data Mining Protection

patterns in a pre-built database. It carries out analysis or knowledge discovery in the databases to evaluate the existing database and large datasets to turn raw data into useful information and find trends and patterns into it.

Online Library Data Mining X Data Mining Protection

Data Mining Vs Data Profiling: What Makes Them Different

Data mining is a process used by companies to turn raw data into useful information by using software to look for patterns in large batches of data.
