The plan is simply tilted to the desired angle. In much of Europe, an axonometric drawing means that the axis is at a 45 degree angle, and for an isometric drawing, the axis is 30 degrees/30 degrees or 30 degrees/ 60 degrees. Axonometric drawings can take on one of several forms, the most common being

Lock your wrist and elbow into a comfortable angle and only move your entire arm when sketching. As you get more skilled, this tip can be relaxed and you can first bend your elbow and ultimately your wrist. In the beginning, by limiting your movement to the entire arm, you'll end up with straighter lines.

Architectural Sketching or How to Sketch like Me
