communication. The information's in terms of binary digits called as digital data and electrical signals called as analog data. The Communication System Lab is designed to help students understand the basic principles of communication techniques as well as giving them the insight on design, simulation and hardware implementation of circuits.

By Professor Lee C. Potter. Dr. Yang Yang.
Electrical and Computer Engineering. The Ohio State University. The laboratory course provides hands-on exploration of physical layer communication. Through a sequence of guided explorations, students design and implement a digital communication system with modulation to an acoustic carrier frequency. The materials are designed to support both a structured laboratory course and self-study; the course is intended for upper-level undergraduates and ...

coordination of the laboratory topics with a lecture syllabus based on any of the many excellent digital communication textbooks, e.g., [Fit07, Mad08, Sch11, Pro01, JS04, Gal08]. The scope of each chapter is selected with the aim of students successfully implementing a portion of an acoustic digital modem during a three hour session.
