Overpopulation | The Human Explosion Explained Diseases Of Globalization Socioeconomic Transition

Among the most important consequences of globalization are changes in the patterns of health and the prevalence of disease. Many treatable illnesses are in decline, but many other conditions are on the increase. In particular, non-communicable, "lifestyle" illness such as heart disease and diabetes are growing rapidly.

Diseases of Globalization, Socioeconomic Transitions and ...

Since 11 September, we have all become acutely aware of what a small world we live in, of how vulnerable we all are to one of the worst diseases of globalisation—terrorism. The extent to which our lifestyles in the affluent North contribute to the poverty and alienation that breed terrorists has been hotly debated.
