Free Energy Generator, Chung Nan Mu - Autogenic Energy, Magnetic Motor - Free Energy Magnetic Engin**Do Energy Magnetic Motors Really**

A magnetic motor (or magnetic energy generator) can provide electricity without having to use fuel. They are typically built with magnets and copper wire coils to provide a greener alternative to electricity. Now think back to science class and the chapter on magnets. Like poles will repel each other while opposite poles attract each other.

Magnet Motor Free Energy Generator: Do they Really Work?

Well,I read carefully the post and I must say few things about the free energy magnetic motors.It is a reality that we can produce free energy using smart mechanical devices working with permanent magnets from Neodymium(i don't know if they work with ferrite as well as with Neodymium).Neodymium is mixed up chemically with two more elements(fe and B).So we get the Ne2Fe12B which the final substance of the magnet.It is 10 times more powerfull than ferrite magnets.No one can say with ...

Do free energy magnetic motors really work?

A permanent magnet motor would not produce energy and would not be a perpetual motion machine. Instead, it would simply use the electromagnetic energy delivered by the angular momentum of the electron in the form of magnetic forces.

Is a Permanent Magnet Motor Feasible? | Power Electronics

The known laws of thermodynamics does not allow the permanent magnet motor to work because there is no energy input due to the nature of permanent magnets. This is the easy explanation. The vast majority of smaller electro motors, and many on electric cars, bikes etc, do have permanent magnets in them, but also electromagnets that controls rotation.

Is a magnetic motor that produces free energy possible...

for those whom say not possible to make a magnetic motor – your living on one. our solar syster is run/controlled by magnetic forces. the earth itself is a magnetic motor, its been running for a VERY long time taking 24hrs to revolve and 365 days for the travel around the sun. dont forget gravity is also magnetic in a different form. so mag motor already exists, now put your brains to work and make one that will put the oil barons out of buisnes.

A REAL and WORKING Magnetic Motor Spinning Indefinitely

Generators and motors in everything from hybrid cars to computer hard drives employ magnets, and researchers are currently investigating the potential of rare earth magnets, exceptionally strong permanent magnets composed of alloys of rare earth elements. Already used in state-of-the-art motors and generators and other energy-sector applications, they represent the next generation in magnetism ' s role in energy production.

i honestly do believe that magnetic motor generator do exist, physics may explain many things but there are somethings thar defly those laws,and we do not understand it either, tesla was a genius and inspired,he did not get the credit he deserved, many of his inventions are at work today,induction coils,ac, and edison was a idiot for not working with him, all he did was invent a light bulb, there are many things out there that we have not discovered yet nor understand yet

Many have attempted constructing a loose energy-generating magnetic motor. I am seeing loads in my each day quest thru opportunity power information, however what I sincerely have discovered is that strength isn ' t always free, perpetual motion machines do no longer exist, the whole thing is taken from someplace and positioned elsewhere.

How to Make a Free Energy Magnetic Motor – Invented...

For instance, magnetic free energy machines are essentially spinning electromagnetic motors. The machine is plugged into an electrical source, which gets the motor's wheel spinning. The machine is then unplugged and the wheel keeps spinning under its own inertia. Then electrical energy is extracted from the spinning wheel.

A free energy magnet motor uses its natural properties such as attraction and repulsion of the magnet poles to create a perpetual motion which can be harnessed to do a useful work. The permanent magnets have invisible and continuous power where it can attract the iron or another specific kind of metal with the energy flow which allows the permanent magnet to defy the gravity for years.
