~~Dogging and rigging. Dogmen and riggers have distinct roles when it comes to crane lifts. Dogmen apply slinging techniques for the purposes of lifting a load. This includes: selecting the method of lifting (by considering the nature of the load, its mass and the centre of gravity) inspecting lifting gear (for suitability and condition) directing the operator of a crane or hoist in the movement of a load.~~

General Guide –Event Rigging 3.1. Responsibilities The WHS regulations require that people undertaking high risk work hold the license appropriate for that class of high risk work. Specific licenses apply for dogging and rigging work; relevant experience in applying rigging skills in a live entertainment or event context is also required.

## ~~LPA Guidelines –Live Performance Australia~~

The three main parts to any load lifting operation are the lifting equipment (crane/derrick/ hoist), the operator/operation of the equipment, and the rigging of the load. This guide focuses on the rigging of the load.

## ~~Rigging Safety Guide –MCAA~~

Rigging is the process used in securing materials to be moved by cranes, hoists and various other lifting equipment. When securing a load with slings or chains, there are many factors to be considered including the working load limit of the hoisting equipment, the weight of the load and rigging equipment, and the capacity of the hoist.

## ~~Dogging and Rigging Course Brisbane, QLD For Quality Training~~

Dogging work is defined as work that includes slinging loads, selecting and inspecting lifting gear and/or directing a crane operator in the movement of a load when the load is out of view of the crane operator. The dogger is responsible for inspecting the lifting equipment.
