the archive is the place where the past manifests itself in the dust, which is all that remains of it. All the more surprising is the fact that she does not refer to the history of the small and invisible that Joseph A. Dust can speed up the chemical processes that lead to chemical deterioration of heritage collections, and makes them dirty so protecting collections from dust is an important first step in slowing deterioration. Figure 1 UV-fluorescent powder is used here to illustrate how dust is transferred into boxes.

And archives do figure into Dust – in fact, part of the book even does ruminate on the physical presence of dust among historical records – but archives are of less interest to the author than the individual historian's reconstruction and telling of the past. Probably the most meaningful chapter from an archivist's vantage point is "The Space of Memory: In an Archive," though even here, the meaning will be much in the eye of the beholder.
