Access PDF End Of Life Care Issues How And Palliative Care A Guide For Healthcare Providers Patients And Families

In end-of-life care, there has been a move towards more individualised care planning. Involving patients in decision-making is fundamental to person-centred end-of-life care. The Mental Capacity Act sets out mechanisms for making decisions on behalf of patients who lack decision-making capacity.

Legal issues in end-of-life care 1: the adult patient ...

Sometimes medical staff, the patient, and family members disagree about a medical care decision. This can be especially problematic when the dying person can't tell the doctors what kind of end-of-life care he or she wants. For example, the family might want more active treatment, like chemotherapy, than the doctors think will be helpful.

Understanding Healthcare Decisions at the End of Life ...

End of life care is not just the practical and technical delivery of care provided to the individual who is dying, but also refers to the support and information available both to them and the people who are important to them, e.g. bereavement support.

- High-quality treatment and care towards the end of life includes: –palliative care that focuses on managing pain and other distressing symptoms –providing psychological, social and spiritual support to patients –supporting those close to the patient. How decisions are made

Ethical Issues in Palliative Care

There are often ethical issues that can arise in the context of end-of-life care, particularly when patients and families make decisions regarding the care they will accept or not accept. As nurses, sometimes our morals and values are in conflict with those that our patients have, and this can cause some distress for the nurse.
