Peugeot 207 & 206 engine ECU with common water damage. This water damaged ECU is a very common failure for Peugeot 206 & 207 vehicles built between 2005 and 2011, the common issue is coolant contamination into the wiring harness that travels via ' capillary action ' up to the plug of the ECU, once the water from the coolant system reaches the ECU it causes the ECU terminals to corrode causing open circuits for various sensors and actuators, this results in host of running problems for the ...
