Owner-Operator Requirements Guide (ORG) for Advanced Reactors, Revision 0 Drawing on input from utilities, vendors, and technology developers, this report examines what utilities and other potential nuclear plant owner-operators want and need with respect to advanced reactor technologies.

Utility Requirements Document (URD) Archives – [EPRI Journal](#)

The Electric Power Research Institute (EPRI) conducts research, development, and demonstration projects for the benefit of the public in the United States and internationally.

EPRI Home

Read PDF Epri Urd The EPRI URD is a living document. It has been and will be routinely updated by EPRI to incorporate lessons learned by the industry that are important to the success of new nuclear plants. With the current revision to incorporate sMLWR, the URD has been revised 13 times over 22 years.

Epri Urd – [ifid2019.org](#)

• EPRI ' s Utility Requirement Document (URD) established framework for advanced light water reactors(ALWR) that provides: - A stabilized requirement basis for new technologies - A standardized set of requirements for use in design certification - A standardized set of requirements for future owner bid packages This framework can provide the basis for successful design, licensing and deployment of advanced light water reactors.

EPRI Utility Requirement Document

Revision 8 of EPRI ' s URD is publicly available for zero-cost downloading. This document encompasses one section of a larger report, titled Flexible Nuclear Energy for Clean Energy Systems. The f ull report can be found at <https://www.nrel.gov/docs/ty20osti/77088.pdf>.

Electric Power Research Institute: Expanding the Concept –

§ High-level review of the existing EPRI ALWR Utility Requirements Document (URD) and other similar resources to determine feasibility of ORD development – Mapping of high-level ALWR URD policies and requirements to a technology neutral framework – Identifying gaps arising due to the technological neutrality

EPRI Advanced Reactor Strategic Program

Abstract This report summarizes a project by EPRI to include requirements for small modular light water reactors (smLWR) into the EPRI Utility Requirements Document (URD) for Advanced Light Water Reactors. The project was jointly funded by EPRI and the U.S. Department of Energy (DOE).

Advanced Nuclear Technology: Advanced Light – [OSTI.GOV](#)

The EPRI URD is a living document. It has been and will be routinely updated by EPRI to incorporate lessons learned by the industry that are important to the success of new nuclear plants. With the current revision to incorporate sMLWR, the URD has been revised 13 times over 22 years.

Advanced Nuclear Technology: Advanced Light Water Reactors –

EPRI states that the licensing design basis is intended to provide an adequate level of safety, whereas the risk evaluation and performance design bases provide additional or enhanced protection. 1.5 Regulatory Stabilization Consistent with the overall ALWR program approach, as described in NUREG-1197, regulatory stabilization for an ALWR design can be achieved through the identification and resolution of plant optimization subjects and generic safety and licensing issues.

NUREG-1242, Vol. 1, 'NRC Review of Electric Power Research –

–Map high-level EPRI ALWR URD policies and requirements to a technology neutral framework (mostly Tiers 0 and 1) –Identify gaps due to technology neutral approach –Seek input on owner-operator expectations; technology attributes and requirements; and information needed by developers, vendors, constructors

The 21st Century – Nucleus

The EPRI URD is a living document. It has been and will be routinely updated by EPRI to incorporate lessons learned by the industry that are important to the success of new nuclear plants. With the current revision to incorporate sMLWR, the URD has been revised 13 times over 22 years. Page 1/2

Ashok Sundaram is a project manager in the Power Delivery and Markets Division at EPRI in Palo Alto, California, U.S. He joined EPRI in April 1993 and has been responsible for management of projects related to power electronics and distribution systems.

Causes, Concerns and Remediation of Stray Voltages on –

The ALWR Requirements Document is a primary work product of the EPRI Program. This document is an extensive compilation of the utility requirements for design, construction and performance of advanced light water reactor power plants for the 1990s and beyond.

Advanced Light Water Reactor utility requirements document –

The EPRI Advanced Light Water Reactor (ALWR) Utility Requirements Document (URD) provides a set of clear, common and consistent owner-operator requirements that are critical to ensure successful, sustainable commercializa- tion. A similar product is necessary to support the commer- cialization of small modular light water reactors (smLWRs).

IN-USE SMALL MODULAR LIGHT WATER REACTOR REQUIREMENTS – [EPRI](#)

the EPRI Utility Requirements Document (URD) elaborate end-user expectations of significant operational flexibility for large LWRs and, in the case of EPRI ' s latest URD revision, small modular LWRs (EPRI 2014b; EUR 2016). Table 1. depicts consensus requirements from utility Electric Power Research Institute: Expanding the Concept ...

There are many EPRI reports with chapters (or more) on lightning and lightning protection that have become publicly available now. Your best option is to go to the EPRI Website <http://www.epri.com/> and search. <SNIP> 2 Searching At the EPRI Website, type in the Search box key words for the topic you are interested in.

Electric Power Research Institute (EPRI) Downloads

ultimately led to the establishment of the Electric Power Research Institute (EPRI). The CES established a task group in the early 1960s to address the increasing interest in synthetic insulation systems. By 1966, the use of polyethylene-based insulations for underground residential distribution (URD) cable systems was widespread. The task

A HISTORICAL REVIEW CABLE ENGINEERING COMMITTEE 1924 – 2008

The approach in the URD for severe accidents involves two main efforts: (1) accident prevention through intrinsic design characteristics, backed up by reliable safety systems to prevent core damage, and (2) incorporation of design features to ensure severe accident mitigation and containment for the full spectrum of postulated accidents, including core melt accidents.
