Flat panel displays are thin panels of glass  
or plastic used for electronically  
displaying text, images, or video. LCD  
(liquid-crystal displays), OLED (organic  
light emitting diode) and MicroLED  
displays are not quite the same, since LCD

# Read Free Flat Panel Display Materials 1998

uses a liquid crystal that reacts to an electric current blocking light or allowing it to pass through the panel, whereas OLED/microLED displays consists of ...
