Flow - Classic Ford  
Cosworth increased its association with Ford in 1969, by developing a double overhead camshaft (DOHC) 16-valve inline four-cylinder engine for road use in the Ford Escort. Working from the Kent block, Cosworth created a 1,601 cc for homologation purposes. The camshafts were driven by a toothed belt, hence the name BDA, literally meaning "Belt Drive, A type". Running in Group 2 and Group 4 on either rallying or touring car racing, this engine could be enlarged to a maximum of 2,000 cc.
