Function notation Worksheet - Weebly

unctiona Function: F of x it is! Functional notation is a way of representing functions algebraically. Function notation makes it easier to recognize the independent and dependent variables in an equation. The function $f(x)$ is read as "f of x" and indicates that x is the independent variable. Consider

Rewrite each function using function notation. 1. Rewrite the function $y = 3x - 8$ using function notation so that the dependent quantity, defined as f , is a function of the independent quantity x . 2. Rewrite the function $y = 3x^2 + 6x - 1$ using function notation so that the dependent
