In addition to quantitative and qualitative insights about construction market drivers and activity, the Global Executive Overview and 74 country reports provide a unique assessment of the construction-related risks in each of the markets profiled.

IHS Global Construction Services

GlobalData's central forecast is for global construction output growth to edge up to 3.2% in 2020 and then to stabilize at 3.4% over the remainder of the forecast period, which runs to 2023. This is in part driven by a projected improvement in the global economy in 2020, which in turn relies on improvements in financial market sentiment and a stabilization in some of the large currently-troubled emerging markets.

Global Construction Outlook to 2023 - Q3 2019 Update

The benchmark global study - the fourth in a series from Global Construction Perspectives and Oxford Economics - shows average global construction growth of 3.9% pa to 2030, outpacing that of global GDP by over one percentage point, driven by developed countries recovering from economic instability and emerging countries continuing to industrialize.

Global Construction Outlook webcast: Construction in ... - IHS

Prior to the outbreak of the coronavirus (COVID-19), the analyst had predicted that there would be an acceleration in the pace of growth in the global construction industry, to 3.1% from 2.6% in...

Global Construction Outlook to 2024 (COVID-19 Impact)

In real value terms (measured at constant 2017 prices and US\$ exchange rates), global construction output is forecast to rise to US\$12.9 trillion in 2022, up from US\$10.8 trillion in 2017. There are intensifying downside risks to global economic growth, notably stemming from the erupting trade war between the US and China, but the global economy will continue to expand in the range of 2.5% to 3% a year in 2018-2022.

Global Construction Outlook to 2022: Q3 2018 Update

Summary The pace of expansion in the global construction industry in 2019 is expected to be the slowest in a decade, standing at 2.6%, according to the author. The slowdown in construction output growth has been particularly severe in advanced economies, including the US, the UK and Australia.
