Guidelines For Laboratory Design Health

Now in its Fourth Edition, Guidelines for Laboratory Design continues to enable readers to design labs that make it possible to conduct scientific investigations in a safe and healthy environment. The book brings together all the professionals who are critical to a successful lab design, discussing the roles of architects, engineers, health and safety professionals, and laboratory researchers.

provided. Labs must be on 100%
exhaust systems (no
recirculation/re-use of lab
exhaust) Design target is 8 - 10
room air changes per hour for
occupied rooms, and 4 - 6 per hour
for

Guidelines for Safe Laboratory Design

Do not chew gum, drink, or eat
while working in the lab.

Laboratory glassware should
never be utilized as food or
beverage containers. Each time
you use glassware, be sure to
check it for chips and cracks.
Notify your lab supervisor of any
damaged glassware so it can be
properly disposed of.
