Most Harleys are air-cooled, which makes perfect sense because the wind cools your engine as you ride. But when you're stuck in traffic, the cooling stops. The slower you go, the more your engine suffers. That's why smart Harley owners install a Harley-Davidson cooling fan. It blows life-saving air across your V-twin even when it's sitting still--which is when it needs it most.

I poked around on the forum and couldn't find anything about the Harley Davidson Coolflow engine cooling fans. Sorry if this is a rehash. When I bought my bike, it had Lovejugs on it. During the summer it did keep the engine cooler, but the heat on my right leg was most uncomfortable, and after a while I took it off.
