Hawking and Falconry for Beginners, a comprehensive, and easily understood guide for beginners. New falconers must ensure they are prepared for the long-term and resounding commitment entailed in practicing this sport to a high standard.

In this fully revised edition of his classic guide to falconry for beginners, lifelong falconer Tony Hall presents the most comprehensive information available to newcomers to the sport. Falconry Basics is specifically designed for novices and covers the basics, from different types of birds and their individual characteristics, to acquiring the proper equipment and the care and handling of the birds themselves.Â Covering all aspects of training, hunting, and maintenance, Falconry Basics addresses every possible scenario a newcom- er may face when training their first raptor, from illness and injury to escaped or overconfident hawks. Hall also provides a wealth of supplementary information for beginners, including notes on anatomy, terminology, and a list of additional resources. Accompanied by diagrams and detailed line illustrations throughout, this book will become a standard manual for future generations of falconers.

The 4,000-year-old sport of falconry, once the pastime of royalty and aristocracy, is still thriving with clubs throughout the UK and the US. Phillip Glasier's book is a classic text on the subject and

considered the definitive guide for falconers. It covers all aspects of falconry from its history and development to training, housing, tools, equipment and skills. There are chapters on: Handling the new arrival • Condition • Manning and early training • Flying free and getting fit • Flying falcons out of the hood • Flying shortwings • Game Hawking • Moulting • Lost Hawks • Hack and Hacking back • Dogs for Hawking • Making hoods, belts, bags and gloves "Glasier" also gives complete details of all the birds most commonly used, and reveals their character and individual temperaments in his own case histories. With every technique explained through step-by-step instructions and illustrated with over 170 photographs and diagrams, "Falconry and Hawking" is an essential reference for falconers throughout the world.

A book/dvd combination title designed to provide all the information needed by a beginning falconer when starting to train a new hawk. It is written by a falconer who has trained 100s of falconers in both the USA and UK and has trained virtually every type of hawk. The author also flies hawks and falcons for bird abatement at airports and other public areas.

This book examines the resources required for using falconry in hunting wild game as well as how falconers must attend to a falcon's needs, how to hunt, and the sport's regulations and responsibilities.

Discover everything you need to know about Falconry and Hawking from Philip Golding, a true master. Inside you'll understand exactly what you need to know in this wonderful sport. Types of bird and their unique characteristics so you know what bird is best for you The important question you need to ask yourself if you want to take up this sport Overview of the training process Equipment you'll need and approximate costs Health and what to look out for Common conditions First aid (a must know) it could save your bird Useful frequently asked questions If you are just starting out in the world of falconry and hawking this is a 'must read' book full of useful information that is easy to follow and understand.

"Having just joined our local falconry club I was recommend to your book and was delighted with what I read. First class" Mr B.Studly "I really found the section on falcon's health a fantastic resource. I also picked up a lot of useful tips in training" Mr T.Thomas "Great to read such a compressive book on falconry... highly recommended" Mr S.Douglas

A Celebration and doctrine for duck hawking, in particular, and falcon management, in general. With 32 pages of color photos and illustrations.
