16th November 2013, publication date of Calculation ERROR. In Warsaw will be the UN Summit of total failure. A will say: We must do more to protect the climate! B shall say: We are deeply in debt, we have no money And my book will carry a new message to the world: Calculation ERROR! With an earlier and more intense change to renewable energy and electric mobility, we would have today a much better situation. Why are we in such a bad situation? Because the economic science has refused to answer since 4 decades the three most burning questions about the future of our civilization, which were raised in the 1972 Limits to Growth: 1.) Are alternative supply chains available for the same service? 2.) What are the possible future shortages and price developments of these supply chains? 3.) How do we switch from one supply chain to another before a shortage hits the economy? Instead to research these 3 questions, economics thought only of their own dogma, that the perfect market solves all problems. The refusal of Economics to use different facts and computational methods brings our civilization to the brink of the abyss. We need a new world view, a new approach for all our serious problems: * Peak Oil Gas Coal Uranium will be reached soon. ☹ * Climate Change! * Many countries in crisis: trade deficit greater than oil imports.☹ * The Lost Generation - youth unemployment.☹ * Working poor - the pay is not enough to live. ☹ * Too little investment in the real economy. Only with a new global movement, we can have a livable future. This is the book, to design this new view of the world to establish this new global movement.

The first comprehensive survey of Standard Modern Greek, this book offers a descriptive analysis of the structure of the language and of present-day usage, highlighting the discussion with examples drawn from a wide cross section of spoken, written, and literary sources.

Project Gus is a personal short story exploring how we see ourselves and the often inhibited guise brought out in social situations by how we believe others perceive us. It is also about friendship and lessons learned. For one middle-aged man, his memories of being bullied as an adolescent sometimes cause him to automatically modify his public behavior. While spending time with Gus, the young son of a close friend, his suppressed insecurities surface. But nine-year-old Gus sees things very clearly - and Gus just wants to play football. A new, personal essay from the author of the emotional nonfiction short MY FATHER.

Microsoft Exchange 2000 Infrastructure Design explains from a system designer's and administrator's perspective Microsoft's Active Directory and its interaction with Exchange 2000, details issues concerned with migration to Exchange 2000, and outlines the specific technology and design issues relating to connectivity with Exchange 2000. Readers will learn to use these technologies to seamlessly co-exist with their current environment, migrate to a native Exchange 2000 environment, and connect to the Internet as well as to other messaging systems. The book's blend of expert instruction and best practices will help any organization create optimal system designs and configurations to support different technical and business scenarios. McCorry and Livengood are experts in Microsoft technologies from Compaq, the world's leading integrator of Exchange systems. In Microsoft Exchange 2000 Infrastructure Design, they spell out the key technologies, features, and techniques IT professionals must master to build a unified and robust Exchange 2000 messaging service. This book details the framework organizations must put in place to most effectively move to Exchange 2000. Detailed explanations of Active Directory integration with Exchange 2000, migration to Exchange 2000 from another system and Exchange 2000 transport, connectivity, and tools Gives readers the benefit of authors' extensive experience Unique description of the software "plumbing" organizations must master to move to Exchange 2000

"Selling Today: Creating Customer Value, one of the most popular sales information books on the market, offers readers a blend of time-proven fundamentals and new practices needed to succeed in today's information economy. It emphasizes the need for salespeople to be guided by the new principle of personal selling: establishing partnerships that are maintained by customer value, created by the salesperson. This edition stresses the need for sales professionals to cope with new forces shaping the world of sales and marketing, and emphasizes the strategies for long-term success. It provides comprehensive coverage of consultative selling, strategic selling, partnering, and value-added selling. Sales force automation is also a major theme. For sales and marketing professionals."--Product description.
