Version 7.3 IBM i

RPG is a modern proprietary high-level programming language (HLL) for business applications, popular on the IBM i operating system on IBM Power Systems hardware. The current version, RPG IV, a.k.a. ILE RPG, provides a modern programming environment. IBM has evolved the language, providing new capabilities, to take advantage of technologies that have grown up in the marketplace.

ILE RPG Reference IBM

Overview RPG programming on IBM i was greatly improved on IBM i 7.1 in the Technology Refresh 7 (TR7) time frame. Additional free-form support for the RPG language and embedded SQL precompiler was provided for H, F, D, and P specs. Free-form C specs were previously supported, and now all RPG specs have free-form support except I and O specs.

Free-form RPG support on IBM i – IBM Developer

ILE program Anzilepgm consists of two
