ICT Development Index - Wikipedia  
Community Development through ICTs. As globalization gains momentum, and boundaries, geographical or mental, are becoming increasingly irrelevant, communities face the challenge of maintaining their identity and improving the condition of their members in a changing world. Meanwhile, many functions and responsibilities are being devolved to the local level, as part of moves towards decentralisation and delocalisation.

Community Development Through ICTs  
Information and communications technology (ICT) skills refer to one's ability to converse with people through various technologies. Similar to information technology (IT), ICT refers to technology use for regular, everyday tasks: sending an email, making a video call, searching the internet, using a tablet or mobile phone, and more.
