translations of ... o Algebraic curves in the complex projective plane P2C Suppose f(x,y)is a polynomial with real coefficients in two variables. Then the graph in R2 which is defined by the equation /(*,3>) =0 A.1) is called a real algebraic Page 17/26

curve-, the degree of f{x,y) is called the degree of this algebraic curve.

Translations Of

Introduction to algebraic curves | Phillip A. Griffiths ... Introduction to Algebraic Curves Algebraic curves and compact Riemann surfaces

comprise the most developed and arguably the most beautiful portion of algebraictions Of geometryatical However, the majority of books written on the subject discuss algebraic curves and compact Riemann surfaces separately, as

parts of distinct ogeneral theories.
