## **Linear Algebra for Everyone, Gilbert Strang**

This book is designed to help students understand and solve the four central problems of linear algebra that involve: (1) linear systems, (2) least squares, (3) eigenvalues, and (4) singular values. The diagram on the front cover shows the four fundamental subspaces for the matrix  $A$ . Those subspaces lead to the Fundamental Theorem of Linear Algebra: (1) The dimensions of the four subspaces, (2) The orthogonality of the two pairs, and (3) The best bases for all four subspaces.
