As we age, some people believe that
losing their teeth is inevitable. This is a
misconception! With proper care your
teeth can last a lifetime. There have been
huge strides made in technological
developments. These modern techniques
can extend the life of your teeth preserving
function and of course a healthy smile.

Oral health begins with clean teeth.

Keeping the area where your teeth meet your gums clean can prevent gum disease, while keeping your tooth surfaces clean can help you stave off cavities. Consider these brushing basics from the American Dental Association: Brush your teeth at least twice a day.

Keeping your smile: Caring for children with joy, love ...

Caring for Smiles is a national programme that provides oral care training for care home staff to ensure they know how to look after the oral health of their residents. This requires regular assessment of an individual's mouth and the development of a care plan with details of his or her particular needs.

food digestion. Speech. Teeth are important in speech development and maintenance of a variety of sounds. Maintaining the shape of the lower face.

Why Are Teeth Important -

DentalCareMatters

Floss your teeth daily. Use a slow and gentle sawing motion. Limit acidic drinks like soft drinks, cordials and fruit juices. Food acids soften tooth material and dissolve the minerals in tooth enamel, causing holes (cavities or caries). In severe cases, teeth may be "eaten" right down to the gum. Limit sugary foods.

Lifestyle tips for healthy teeth - NHS
National Smile Month ☐ Caring for your
Smile National Smile Month starts this
week and it aims to promote good oral
health. It's a great time to review your oral
health routine and make sure that you are
doing all the right things to look after your
mouth, including seeing the dentist and
hygienist as often as they recommend.

National Smile Month ☐ Caring for your
Smile

Keep it with you all times. Keep your
