adaptations, and endangered species. It includes questions, observation activities, crossword puzzles, research projects, study sheets, unit tests, a bibliography, and an answer key.

Sharks and dolphins both have torpedo-shaped bodies with fins on their backs. They slice through the water to grab their prey with sharp teeth. But despite their similarities, sharks and dolphins belong to different animal classes: one is a fish and gets oxygen from the water and the other is a mammal and gets oxygen from the air. Marine educator Kevin Kurtz guides early readers to compare and contrast

these ocean predators through stunning photographs and simple, nonfiction text.

A fascinating chronicle of the evolution of humankind traces the genetic history of the organs of the human body, offering a revealing correlation between the distant past and present-day human anatomy and physiology, behavior, illness, and DNA. Reprint. 75,000 first printing.

This is a guide for those caring for or supporting an adult with AS. It will help them understand the condition and the difficulties it may cause so that they can offer support. Practical strategies are offered to combat problems that may arise, and common issues that specifically occur with individuals diagnosed later in life are addressed.

This laboratory manual is designed for an introductory majors biology course with a broad survey of basic laboratory techniques. The experiments and procedures are simple, safe, easy to perform, and especially appropriate for large classes. Few experiments require a second class-meeting to complete the procedure. Each exercise includes many photographs, traditional topics, and experiments that help students learn about life. Procedures within each exercise are numerous and discrete so that an exercise can be tailored to the needs of the students, the style of the instructor, and the facilities available.
