history of the continent from the Enlightenment and the French Revolution to the present day. Avoiding a detailed, lengthy chronology, the book focuses on key events and ideas to explore the causes and consequences of revolutions—be they political, economic, or scientific; the origins and development of human rights and democracy; and issues of European identity. Any reader needing a broad overview of the sweep of European history since 1789 will find this book, published in a first edition under the title *Revolutionary Europe*, an engaging and cohesive narrative.

According to the AAPC, a Certified Professional Medical Auditor has a good understanding of the knowledge of medical documentation, fraud, abuse, and penalties for documentation and coding violations based on governmental guidelines, and is well trained on medical record auditing skills. Of the various topics covered in the exam, Auditing, Documentation, Regulatory Standards and Statistical sampling are among those that are most difficult. This book focuses on these exam topics: Auditing, Documentation, Standards and Statistical sampling.

Fully updated to reflect the ongoing changes in international accounting standards, "International Financial Reporting" contrasts the processes of convergence on global harmonisation with the continuing causes of national diversity in accounting

and accountability. It analyses the work of the International Accounting Standards Board in setting internationally applied standards (IFRS) of measurement and disclosure. Key Features - Chapters on research in international accounting, commended by users of previous editions. - Coverage of use of accounting information by global market participants. - Includes examples of accounting practices drawn from the published accounts and reports of multinational companies such as Heineken, Kingfisher, Kodak and Wal-Mart. - A chapter on Aissues in multinational accountingA provides a comparative discussion of national practices in relation to IFRS. New to this edition - Increased focus on accountability in corporate reporting, particularly the impact of the Sarbanes-Oxley Act. - Focus on the whole annual report including narrative reporting - The development of financial reporting practices across Europe is integrated in one chapter with particular reference to Poland as the largest economy entering the EU in the 2004 enlargement. "International Financial Reporting: A Comparative Approach" is ideal for advanced undergraduate and postgraduate students of accounting and international business, studying in any country throughout the world. Clare Roberts BSc MSc PhD is Professor of Accounting at the University of Aberdeen. This book accounts for whether and how the path of the European Union (EU) has developed towards potential disintegration. These questions have become particularly relevant since the outbreak of the debt crises in the Eurozone and the Brexit referendum. The author critically subverts theories of European integration and analyses the rise and fall of federations, empires and states in a comparative perspective. The most promising theory presented here indicates that Brexit is not likely to be followed by other member states leaving the EU. Nevertheless, the EU has been undermined from within as it cannot adequately address Eurosceptic dissatisfaction from both the left and right. This book is an essential read for everyone interested in the EU and its future.

About the necessity and usefulness of developing a philosophy specific to the blockchain technology, emphasizing on the ontological aspects. After an Introduction that highlights the main philosophical directions for this emerging technology, in *Blockchain Technology I* explain the way the blockchain works, discussing ontological development directions of this technology in *Designing and Modeling*. The next section is dedicated to the main application of blockchain technology, Bitcoin, with the social implications of this cryptocurrency. There follows a section of Philosophy

in which I identify the blockchain technology with the concept of heterotopia developed by Michel Foucault and I interpret it in the light of the notational technology developed by Nelson Goodman as a notational system. In the Ontology section, I present two developmental paths that I consider important: Narrative Ontology, based on the idea of order and structure of history transmitted through Paul Ricoeur's narrative history
