Day 1 Marine Biology, Water, and the Earth. Day 2 Light, Pressure, and Weather ... Squid Dissection. Today we are dissecting Squid-You have to have a complete page drawing of your squid before it is dissected with all of its exterior parts labeled

~~David Bird Science - Squid Dissection~~

Orient the squid so that the tentacles are away from you, at the top of the dissection tray. Spread out the arms, tentacles, and fins. Draw and label the external parts of the squid: arms, tentacles (have suckers only at the tips), head, eyes, fins, mantle, funnel, tail, suckers, beaks (where each would be found on an intact squid) and mouth.

~~Squid Dissection - BIOLOGY JUNCTION~~

Our summer campers had been honing their observation and inquiry skills all week long in our brand new "Marine Biology Afoot and Afloat" camp. The squid dissection was the final activity of the week, and students were eager to show off what they'd learned ...and to get a little messy. I set the foundation for the large dissection by spending an hour leading the students through dissecting their very own 15 cm long market squid.

TAISHA HENRY - Squid Dissection Lab Report.pdf -... This preview shows page 1 - 3 out of 7 pages. Taisha, Henry Marine Biology PPA Mr. I Introduction: During class we learned about loligo pealei. The purpose of us dissecting was to examine the main body parts in the squid's body and how the parts in the squid are beneficial to them. What I was hoping to learn from this experience of the dissection was how the parts in the body work like how does the three hearts work in the loligo pealei body ...
