Mcgraw Hill Study Guide Reinforcement Biology Answer Key

The study of the activities, functions, properties, and structures of cells. Cell biology focuses on the notion that the cell is the fundamental unit of life. Cells were discovered in the middle of the seventeenth century after the microscope was invented. In the following two centuries, with steadily improved microscopes, cells were studied in a wide variety of plants, animals, and microorganisms, leading to the discovery of the cell nucleus and several other major cell structures or ...
