Thus mechatronics is a design philosophy, an integrating approach to engineering. Mechatronics brings together areas of technology involving sensors and measurement systems, drive and actuation systems, and microprocessor systems (Figure 1.1), together with the analysis of the behaviour of systems and control systems.

Mechatronics is the integration of electronic, electrical and control engineering with computer technology to provide solutions to mechanical engineering problems. This clear introductory text provides a basic understanding of mechatronics and meets the requirements of the BTEC Mechatronics A and B units (1413G and 1414G). It will help engineers and technicians to develop the necessary skills ...
