The specific model/vintage of Big Block V8 Mercruiser Engine can be determined by looking at the last letters of the engine code which is stamped by General Motors at the time of assembly on all complete Marine Longblocks. If the serial number and/or model decals are missing, the Engine code will help to determine the engine model. Refer to the drawing below for the specific engine code location on your Mercruiser Engine. Information you need from the engine code, example M01187MH. 7=General

Locating MerCruiser Serial
Number Tags. Engine Serial

Number: The serial number tag is
located near the starter, by the
flywheel housing; or, on the
rocker arm or flame arrestor

cover. Transom Plates: The serial
number tag is located on the
inner transom plate inside the
boat; or, on the upper swivel pin.

Sterndrive Serial Number
(separate from engine): The serial
number tag is located on the
upper drive shaft housing
(starboard side or on the back of
the housing).

Where Is The Serial Number On My MerCruiser Sterndrive? The serial number is essential for finding the MerCruiser inboard/outboard engine parts you need. Find the serial number for your engine near the starter, the rocker arm, or on the flame arrestor cover. For drive parts, find the sterndrive serial number on the right side of the drive shaft housing. You can also search for MerCruiser sterndrive parts by year.

Genuine Mercury & Mercruiser parts

The serial number format is the same. Japanese Mariner motors have a totally different serial number scheme, e.g.

"6A3-S-123456 " We currently do not have those here, but are largely useless. These motors do not have any consistent year-to-serial scheme. Mercury ceased publishing this information after the 1996 model year.
