M3 Output Management (MOM)—M3 ideas

Movex M3, PageOut, Scenario, Scripting. Scenario: You have to output the final three characters of a field value coming from a datastream however, the string of the value can vary from 3 characters on-wards, i.e. the value is never fixed. Open the process. Add the variable version of the field you wish to format.

Movex M3 | StreamServant

Anybody who has worked with Infor M3 (or the older Movex versions) knows what a pain output management can be. The basic reports which come out of M3 look like they were created back in the old greenbar paper, dot-matrix printer days (because, well, chances are they were). Getting data out of the system in a manner which users want is often a struggle that leads to developing a separate reporting platform, using software like Crystal Reports or Microsoft Reporting Services.
