DNA and Genetics Key Concept Builder LESSON 3 Key Concept

Molecular genetics. The field of molecular genetics describes the basis of inheritance at the molecular level. The genetic material in most organisms is deoxyribonucleic acid (DNA) [see illustration], which is a very long polymer made up of four different nucleotide monomers: adenine (A), guanine (G), cytosine (C), and thymine (T).A landmark discovery was the demonstration in 1953 by James ...
