With a precision engineering pedigree, PRM Newage Ltd has established an enviable reputation as a specialist in the design and manufacture of high efficiency mechanical driveline equipment. From its roots at the birth of the UK automotive industry, the company has evolved a product range that encompasses a wide variety of driveline solutions, such as the NEWAGE brand of Off-Highway and Ground Support axles, as well as the world renowned PRM gearbox range for Marine applications.

NEWAGE axles and PRM marine gearboxes

PRM marine transmissions have established a world-wide reputation for quality, reliability and in-service performance, making them the ideal choice for pleasure, workboat and fishing vessel applications. All gearbox components are designed and manufactured for maximum reliability over an extended service life, so when correctly matched to engine and propeller, PRM gearboxes will provide trouble free operation for many years.

Marine gearboxes and accessories | PRM Newage Ltd

A mechanical gearbox (PRM 60, 80, 90, 120 or 125) must use automatic transmission fluid (ATF) Dextron II or III Hydraulic gearboxes, we recommend 15W40 mineral oil (not synthetic) for typical use. For extreme temperatures see owners handbook. Always check the oil level with the dipstick screwed down.

Marine Gearbox Accessories | PRM Newage Ltd

Hydraulic Gearboxes | PRM Newage Ltd. Products > Marine Gearbox > Hydraulic. All our hydraulically operated gearboxes feature a twin countershaft design which enables full rated power to be transmitted in ahead or astern with either left or right handed propellers. Hydraulically operated adjustment free multi disc clutches ensure rapid response to operation of the control lever for good boat handling and manoeuvrability.

Hydraulic Gearboxes | PRM Newage Ltd

The PRM150 marine gearbox is purpose built for use with both pleasure craft and commercial boats; its twin countershaft design provides separate oil-operated multi-disc clutches (which need no adjustment) for ahead or astern drive allowing full rated power to be transmitted continuously in either direction. The reduction ratios offered (1.53:1. 2.09:1 and 2.82:1) are all available for left-hand or right-hand propeller rotation in "ahead", making PRM150 particularly well suited to twin engine ...
