Nuclear medicine trainees will be expected to combine their skills as a physician with that of a physiological imager to solve diagnostic problems. They will provide a unique insight into the pathophysiology of disease and where appropriate offer a radionuclide therapeutic option for treatment.

~~Nuclear Medicine | JRCPTB~~

Nuclear medicine is a medical specialty involving the application of radioactive substances in the diagnosis and treatment of disease. Nuclear medicine imaging, in a sense, is "radiology done inside out" or "endoradiology" because it records radiation emitting from within the body rather than radiation that is generated by external sources like X-rays. In addition, nuclear medicine scans differ ...
