Oral ulcers are characterised by a loss of the mucosal layer within the mouth. This loss may be acute or chronic, localised or diffuse. This is one of the most common oral problems presenting in primary care and can arise as a result of a number of disorders.

~~Oral Ulceration. Symptoms and Causes of Mouth Ulcers~~

Ulceration of the oral mucosa may be caused by trauma (physical or chemical), recurrent aphthae, infections, carcinoma, dermatological disorders, nutritional deficiencies, gastro-intestinal disease, haematopoietic disorders, and drug therapy (see also Chemotherapy induced mucositis and myelosuppression under Cytotoxic drugs).

~~Oral ulceration and inflammation | Treatment summary | BNF ...~~

Mouth ulcers are painful areas in the mouth and gums. They are also known as canker sores. While mostly harmless, mouth ulcers can be extremely uncomfortable and make it difficult for some people...

~~Mouth ulcers: Types, causes, symptoms, and treatment~~

An ulcer is defined as a break in the skin or mucous membrane which fails to heal leading to a loss of surface tissue, disintegration and epithelial necrosis. 1 Oral ulceration can be idiopathic, infectious, autoimmune or malignant in aetiology.

~~Oral Ulceration | Aetiology, Symptoms, Signs | Geeky Medics~~

Oral mucosal ulcerations are common. Most are self-resolving and transient (e.g., after a simple cheek bite). However, some may require the intervention of a medical or dental practitioner. For example, the serious and potentially life-threatening condition oral carcinoma often initially manifests as a solitary oral mucosal ulceration.

~~Assessment of oral ulceration - Differential diagnosis of ...~~

The mucosae (plural of mucosa) are lubricated skin surfaces such as the areas found inside the mouth, nose, and vagina. Oral ulcers can occur anywhere inside the mouth, but most commonly they develop on the roof of the mouth. Another term used for mucosal ulcers, especially when there is widespread inflammation, is “mucositis”.

Chlorhexidine gluconate 0.2% mouthwash is used for aphthous ulcers (particularly if it is too painful to brush teeth). It should not be used at the same time as nystatin because it reduces the activity of nystatin. For management of pain associated with aphthous ulcers, see Scenario: Oral pain.

~~Scenario: Mouth ulcers and mucositis | Management ...~~

A mouth ulcer is an ulcer that occurs on the mucous membrane of the oral cavity. Mouth ulcers are very common, occurring in association with many diseases and by many different mechanisms, but usually there is no serious underlying cause. The two most common causes of oral ulceration are local trauma and aphthous stomatitis, a condition characterized by recurrent formation of oral ulcers for largely unknown reasons. Mouth ulcers often cause pain and discomfort and may alter the person's choice o

~~Mouth ulcer - Wikipedia~~

Aphthous ulcers are painful, clearly defined, round or ovoid, shallow ulcers that are confined to the mouth and are not associated with systemic disease. They are often recurrent, with onset usually in childhood. Single ulcers, or recurrent ulcers in the same place, may be caused by damage to the mouth, for example biting the cheek, or damage to the buccal mucosa with a toothbrush, sharp tooth, or filling.

~~Aphthous ulcer | Topics A to Z | CKS | NICE~~

The oral mucosa is primarily involved in less than 1% of melanomas. Lesions are largely macular, but nodular and even pedunculated lesions occur. The pigmentation varies from dark brown to blue-black; however, mucosa-coloured and white lesions are occasionally noted, and erythema is observed when the lesions are inflamed.

Hydrocortisone is a type of medicine known as a corticosteroid or 'steroid'. Corticosteroids are not the same as anabolic steroids. Hydrocortisone buccal tablets relieve the soreness of mouth ulcers and speed up healing. This medicine is available on prescription.

~~Hydrocortisone buccal tablets: steroid for mouth ulcers - NHS~~

Ulceration of the oral mucosa may be caused by trauma (physical or chemical), recurrent aphthae, infections, carcinoma, dermatological disorders, nutritional deficiencies, gastro-intestinal disease, haematopoietic disorders, and drug therapy.

~~Oral ulceration and inflammation | Treatment summary ...~~

Eosinophilic ulcer of the oral mucosa is an uncommon benign ulcer seen in middle-aged to elderly adults that appears suddenly in the mouth or on the lips, is usually painful, and heals over a few weeks. It may represent a nonspecific reaction pattern to trauma.

~~Eosinophilic ulcer of the oral mucosa | DermNet NZ~~

Although there are many causes of oral ulceration, recurrent oral ulceration has relatively few causes, most commonly aphthous stomatitis, but rarely Behçet's disease, erythema multiforme, ulceration associated with gastrointestinal disease, and recurrent intra-oral herpes simplex infection. A systemic cause is more likely in adults who suddenly develop recurrent oral ulceration with no prior history.

~~Aphthous stomatitis - Wikipedia~~

Stomatitis, a general term for an inflamed and sore mouth, can disrupt a person's ability to eat, talk, and sleep. Stomatitis can occur anywhere in the mouth, including the inside of the cheeks,...

~~Stomatitis: Types, Symptoms, Causes, and Treatment~~

Oral squamous cell carcinoma (SCC) presents in several clinical forms: either as a white lesion (leukoplakia), a red lesion (erythro- plakia), a red and white lesion (erythroleukoplakia), an indurated mass, or as a mucosal ulcer.

~~Differential diagnosis and management of oral ulcers~~

In COVID-19 patients we should consider the occurrence of some oral signs and symptoms, including dysgeusia, petechiae, candidiasis, traumatic ulcers, HSV-1 infection, geographical tongue, thrush-like ulcers, among others.

~~Oral mucosal lesions in a COVID-19 patient: New signs or ...~~

Pathological mucosal conditions of the oral cavity and jaws commonly present as a mucosal ulcer or a white, red or pigmented lesion. In this review, the authors outline the most common conditions organised according to their clinical presentation and describe their typical appearance and management.
