The Sustainable Packaging Coalition defines eight criteria that make a package sustainable: It's beneficial, safe and healthy for people for its whole life cycle Its price and performance are competitive Renewable energy is used not only to produce it, but to ship, source, and recycle it

7 Top Sustainable Packaging Innovations in 2019 - Healthy ...
Packaging converters that can combine sustainability and hygiene with additional requirements (such as costs, performance, and convenience) are more likely to succeed than converters that focus on one or two factors. Although sustainability remains a key industry-shaping trend, pre-COVID-19 approaches will not be enough to address it.
